

# **PTU Series** Floor Level Coverage

## **GUIDELINES FOR DETERMINING RADIANT PATTERN:**

**Y FEET** = (1.7 X Mounting Height) + Heater Length

**X FEET** = 2.2 X Mounting Height

**Example:** PTU125-30' mounted at 18 Feet  
(Heater length is approximately 16 feet)

**Y Feet** = (1.7 x 18') + (16') = **46.6 feet**

**X Feet** = 2.2 x 18' = **39.6 feet**

**SPACE-RAY**

**NOTE:** Always observe the minimum recommended mounting heights shown on the specification sheet and use U-Tubes for spot heating applications
